Contact : +880 1979-290972

PERSONAL PROJECTS

TechStore E-Commerce

- Built the overall site layout and core functionalities using Next.js and Redux Toolkit, GSAP to create a dynamic and user-friendly shopping experience, leading to a significant increase in customer engagement.
- Contributed to the design of request and response payloads of API endpoints in collaboration with a 20+ person product team and backend developers.
- Web Developer (intern) Improved website load time by optimizing images, minifying CSS and JavaScript, resulting in 30% faster load speed
- Suggested and implemented a responsive design strategy that increased mobile traffic
- Utilized Framework such as NextJS, Tailwind and Bootstrap to create user-friendly websites

Covan Beauty E-Commerce

- Ensures a seamless shopping experience on all devices.
- Display multiple categories like skincare, makeup, haircare, and wellness products.
- Designed and developed the front-end layout using Next.js and Redux Toolkit, creating a responsive and dynamic user interface for a beauty product e-commerce website.
- Developed the product display pages and shopping cart UI, ensuring users could easily browse products and add them to their cart.
- Optimized the user experience by improving site performance through image optimization and lazy loading assets, resulting in faster load times.

Orebi Ecommerce

- Developed the front-end of the Orebi platform, utilizing Next.js and React.js to create a dynamic, fast, and responsive interface.
- Designed and implemented the product catalog UI, allowing users to filter and sort products by categories, price, and ratings using Tailwind CSS for a modern look and feel.
