SUMMARY

I'm a full-stack developer passionate about crafting impactful software products. I create robust digital solutions by combining deep system knowledge with engaging user experiences. This elevates brands and delivers seamless functionality. Let's bring your brand's digital vision to life!

WORK EXPERIENCE

Frontend Developer, Blinto LLC

Jan 2025– Present

- Spearheaded the development of AMI's SaaS platform, managing physical assets for industries like banking, leasing, and OEMs, ensuring a user-friendly interface.
- Optimized frontend performance, reducing load times by 30% with modern frameworks and code splitting techniques.
- Collaborated with the backend team to implement scalable APIs, contributing to a 25% improvement in system integration speed.
- Delivered pixel-perfect, responsive UIs, ensuring zero critical bugs post-release and seamless post-launch performance.
- Took independent ownership of frontend modules, resulting in a 40% reduction in team dependency for bug fixes and feature rollouts.
- Contributed to a 95%+ code coverage in frontend test suites, boosting application reliability.

Full-Stack Developer (Remote), Havetic It

Feb 2023 – Dec 2024

- Developed full-stack web applications and APIs, achieving a 20% reduction in project turnaround time by translating business and sales requirements into scalable solutions.
- Led in-house development efforts including application architecture, code optimization, and team collaboration for efficient delivery.
- Maintained strong alignment with business objectives, accelerating milestone completion and enhancing overall team productivity.

SKILLS

- **Frontend:** JavaScript, TypeScript, php, React, Redux, Next, TanStack Query, Wordpress Plugin
- **Backend & APIs:** Node.js, Express, NestJS REST API development and integration.
- **Databases:** MongoDB, MySQL.
- **Version Control & DevOps:** Git, GitHub, GitHub Actions, CI/CD pipelines.
- **Tools & Workflow:** Git, GitHub, ClickUp, Asana , Postman, Figma, Xd.
- **Project Management:** Familiar with Agile methodologies, Scrum practices, and sprint-based development.
- **Other:** Team collaboration, Client communication, Code optimization, Cross-functional coordination.

PROJECTS

SaaS Asset Management International (Blinto LLC)

- Spearheaded the development of AMI's SaaS platform, managing physical assets for industries like banking, leasing, and OEMs, ensuring a user-friendly interface.
- Developed a full user role management system for AMI's SaaS platform, leveraging MERN stack (MongoDB, Express, React, Node.js) for most functionalities, while utilizing PHP and MySQL for certain client-specific requirements.
- Utilized Node.js and Express for scalable server-side features, including handling API integrations and real-time data processing.

- Solved complex use cases, such as multi-tiered role systems and conditional permissions, ensuring smooth functionality across the platform. Implemented JWT-based authentication and OAuth for secure login and role verification.
- Ensured that data integrity was maintained across both MERN and PHP/MySQL environments, making sure that role assignments and changes were consistently synchronized.
- Utilized Node.js and Express for scalable server-side features, including handling API integrations and real-time data processing.

Ecommerce System (Havetic It)

- Simplify the checkout process with multi-step forms, real-time payment gateway integration, and dynamic cart updates to reduce friction.
- Ensure the system can handle increasing product listings, transactions, and user interactions without performance degradation.
- Integrate secure payment gateways with encryption to protect customer data during transactions.

Inventory Management System (Havetic It)

- Product Catalog & Inventory Management: Showcase detailed product listings with real-time inventory tracking, ensuring accurate stock levels and easy browsing for users.
- E-commerce Functionality: Enable direct online purchases with a secure checkout process, payment options, and order tracking for a seamless customer experience.
- Sustainability Focus: Highlight the brand's commitment to energy-efficient and eco-friendly lighting solutions, with clear messaging on environmental benefits.
- User-Friendly Design & Navigation: Ensure a clean, responsive design for easy navigation across all devices, optimized for both product discovery and purchasing.

Finest Process Management(FMS) (Havetic It)

- FMS offers complete transparency into every stage of a process, enabling real-time monitoring, role-based access, and proactive decision-making.
- Handled large-scale content delivery by optimizing backend APIs, applying lazy loading, and setting up CDN support for heavy media.
- This project taught me how to architect for collaboration, scalability, and real-world content lifecycle management.
- Assigns specific roles and permissions to ensure accountability, minimize confusion, and enhance cross-functional collaboration.
- Provides real-time visibility into task statuses, bottlenecks, and deadlines through dashboards and smart notifications.

ACHIEVEMENTS

Champion – Web Development, Creative IT Institute

- Secured 1st place among dozens of participants in web Development competition.
- Recognized for applying strong UI/UX principles, creativity, and problem-solving to deliver a responsive, user-focused website within time constraints.
- Showcased expertise in frontend development by building a visually compelling, responsive website with clean code structure and user-centric design.

EDUCATION

Web Development

Creative It Institute (FDR2401)

Higher Secondary Education

Kurigram Govt. College, Kurigram
